Contractor’s Phone No. (____) ______________ Email (Required):____________________

Existing Driveway Approach: Width: __________ ft. __________ in.

Proposed Driveway Approach: Width: __________ ft. __________ in.

It is understood and agreed that the new driveway approach will be constructed in accordance with the attached plans and specifications and that the existing grades will not be changed. Concrete shall be a minimum of seven (7) inches thick and asphalt shall be a minimum of three (3) inches thick on a six (6) inch crushed stone base. Concrete shall be a six-bag air-entrained mixture. Wire mesh shall not be placed in the driveway approach. It is further understood and agreed that if the street curb is replaced, contractor will install new curbing to match the existing street curb flange and flow line elevations. All damaged road pavement shall be restored to its original condition.
