May 20, 2020

To all that live, learn, work, play and visit in Greendale:

I want to thank all of you for your dedication to the Greendale community by doing your part to slow the spread of COVID-19. Our goal continues to be the same as yours, to reopen as safely and responsibly as possible, while giving confidence to our businesses and residents that it is safe to participate in public life.

Beginning Friday, May 22, 2020, all remaining businesses will be allowed to open, if they choose to, using recommendations from the Centers for Disease Control (CDC) and the Wisconsin Economic Development Corporation's safe business practices.

Public health departments have carefully tracked key indicators to guide the safe reopening across the community, county, and state. As such, we have outlined recommendations to guide future phases of reopening. Please see the Recommendations to Safely and Responsibly Re-Open Greendale.

The Greendale Health Department will continue to monitor these key indicators weekly and communicate to the community regularly via social media and on our website, which phase we are currently in and if we are approaching the transition to a new phase.

The threat of COVID-19 is still very much alive in Greendale and throughout Southeastern Wisconsin. It is up to each of us to play our part in protecting ourselves, our families, our customers, and our community moving forward. I am confident the Village of Greendale is up to the challenge.

Please contact the Greendale Health Department at 414-423-2110 or email greendalehealth@greendale.org if you have any questions.

Sincerely,

Susan Shepeard, MSN, RN
