**STANDING COMMITTEE REPORTS**

A. Finance Committee January 27, 2014 Meeting

The Finance Committee meeting regularly scheduled for January 27, 2014 was cancelled. The Board will suspend the rules and consider approving the business items as part of the January 21, 2014 regularly scheduled Board meeting agenda.

i. Consider approving an agreement with an Architectural firm to conduct a Space Needs Analysis of the Fire Station (FC 14-04)

Fire Chief Saidler presented the need for updating the current Fire Station which is 47 years old and has been characterized as functionally obsolete but capable of being updated. Saidler stated that Manager Michaels included $50,000 in the 2014 Budget to conduct a Space Needs analysis of the Fire Station and after Board approval of the Budget sent out a Request for Proposals on December 4, 2013, which were due on January 17, 2014. A facility tour of the Fire Station was conducted on December 20, 2013 for any interested bidders. Eight firms submitted proposals and the Village Manager, Director of Inspection Services and the Fire Chief reviewed them and chose Bray Architects to provide a space needs analysis.
Trustee Birmingham moved, seconded by Trustee Barbian, to approve executing an agreement with Bray Architects to conduct a Space Needs Analysis for the Village of Greendale’s Fire Station, for a total amount not to exceed $20,000 with funds to be charged to Capital Improvement Fund – Buildings Account.

Trustee Turay asked if there was a justification for not picking the less expensive bids. Manager Michaels stated that because this is a professional services contract it can be based on experience and quality not just bid price. Trustee Chadwick asked if the Fire Chief has looked at Oak Creek or St Francis stations yet. Chief Saidler said they are building new stations and are much further along than we are, however he has talked to the Fire Chiefs of both communities and they highly recommend this firm. Trustee Genz wanted to know the criteria used to pick Bray Architects. Chief Saidler stated that some of the other firms did not have as much experience in the needs analysis of Fire Stations. Genz also asked if the needs analysis was necessary for a remodel. Director Satula stated that the needs analysis would save money in the actual building design and avoid the building being overbuilt or under built. Manager Michaels stated that this analysis will tell the current needs of the building and if it will fit into a remodel or a new building. Trustee Birmingham wanted to know if buildings are still designed without this analysis. Satula said yes, but this is a unique facility with specialized needs to be considered by an experienced architectural firm. Birmingham expressed his appreciation for the work done by the staff to analyze the proposals.

ii. Consider approving the purchase of Tactical Body Armor (FC 14-05)

Manager Michaels presented the request for the purchase of tactical body armor which is higher grade than the armor worn daily by officers used mostly for SWAT teams for specialized training to be used to resolve high risk incidents. Michaels stated that the existing armor is severely outdated and the new specialty body armor is expected to stop all different types of bullets. It was included in the in 2014 Budget for the amount of $16,700.

Trustee Birmingham moved, seconded by Trustee Turay, to approve the purchase of nine (9) pieces of tactical body armor with the necessary accessories. The funding for this project will come from the Police Department 2013 Equipment Replacement Fund budgeted amount of $16,700.

Trustee Chadwick asked if nine pieces was all the department needed. Manager Michaels mentioned it was for the SWAT team and assumed there are nine members. Trustee Birmingham mentioned that our insurance company, CVMIC, found our outdated equipment to be a factor in the Village’s insurance rates. Trustee Turay and Trustee Barbian commended the Police Chief for his diligence in saving the Village money. The original amount budgeted for this equipment was $30,000 but through grant funding opportunities, competitive shopping and using the bidding process this equipment will be purchased at a substantially lower price.
